Journal of Applied Mechanics

Author Index

All authors of papers published in this volume are listed alphabetically. Full titles are included in each first author's entry. Letters in parentheses follow some of the page numbers: BN indicates Brief Note, D indicates Discussion, E indicates Errata, and BR indicates Book Review.

Adhikari, S., and Wagner, N. — Analysis of Asymmetric Nonviscously Damped Linear Dynamic Systems. **70,** 885–893

Akin, J. E., Tezduyar, T., Ungor, M., and Mittal, S. — Stabilization Parameters and Smagorinsky Turbulence Model. **70,** 2–9

Alexandrov, S. — Comparison of Double-Shearing and Coaxial Models for Pressure-Dependent Plastic Flow at Frictional Boundaries. **70,** 212–219

Atwood, J. L. — (see Chen, Z.) **70,** 611–612(BN)

Auricchio, F., and Sacco, E. — Refined First-Order Shear Deformation Theory Models for Composite Laminates. **70,** 381–390

Bacon, C., Guilliorit, E., and Hosten, B. — An Acoustic-Microwave Method for the Study of the Mechanical Influence of Moisture Content in Materials. **70,** 268–274

Bakhtiyarov, S. I., Overfelt, R. A., Meir, A. J., and Schmidt, P. G. — Experimental Measurements of Velocity, Potential, and Temperature Distributions in Liquid Aluminum During Electromagnetic Stirring. **70,** 351–358

Bamberger, H. — (see Djerassi, S.) **70,** 568–574

Barber, J. R., Grosh, K., and Oh, S. — Energy Considerations in Systems With Varying Stiffness. **70,** 465–469

Baumberger, T. — (see Cochard, A.) **70,** 220–226

Bažant, Z. P. — Shear Buckling of Sandwich, Fiber Composite and Lattice Columns, Bearings, and Helical Springs: Paradox Resolved. **70,** 75–83

Belytschko, T. — (see Chessa, J.) **70,** 10–17

Benney, R. — (see Stein, K.) **70,** 50–57

____ (see Stein, K.) **70,** 58–63

Betti, R. — (see Luş, H.) **70,** 715–723

Beunder, E. M., and Rem, P. C. — The Motion of a Rolling Polygon. **70,** 275–280

Blanchard, J. P. — Elastic Waves Induced by Surface Heating in a Half-Space. **70,** 613–615(BN)

Borodich, F. M., and Keer, L. M. — Discussion: "Normal Indentation of Elastic Half-Space With a Rigid Frictionless Axisymmetric Punch" (Fu, G., and Chandra, A., 2002, ASME J. Appl. Mech., **69**, pp. 142–147). **70,** 783(D)

Brock, L. M. — Transient Study of Mode III Fracture in an Elastic Solid With a Single Plane of Material Symmetry. **70,** 227–233

Bureau, L. — (see Cochard, A.) **70,** 220–226

Burns, S. J. — (see Debesis, W. R.) **70,** 606–610(BN)

Çalim, F. F. — (see Temel, B.) **70,** 281–291

Calzado, F. J. — (see Mantič, V.) **70,** 817–824

Carpinteri, A. — (see Pugno, N.) **70,** 832–839

Cartmell, M. P. — (see Zak, A. J.) **70,** 313–327

Chalon, F., and Montheillet, F. — The Interaction of Two Spherical Gas Bubbles in an Infinite Elastic Solid. **70,** 789–798

Chan, Y.-S. — (see Paulino, G. H.) **70,** 531–542

Chandra, A., and Fu, G. — Closure to "Discussion of 'Normal Indentation of Elastic Half-Space With a Rigid Frictionless Axisymmetric Punch' " (2003, ASME J. Appl. Mech., **70**, pp. 783). **70,** 783

Chao, C.-K., and Gao, B. — Indentation Problems of Two-Dimensional Anisotropic Thermoelasticity With Perturbed Boundaries. **70,** 169–179

Chen, C.-K. — (see Kuo, B.-L.) **70,** 926–929(BN)

Chen, M.-R. — (see Chung, Y.-L.) **70,** 668–675

Chen, W. Q. — (see Ding, H. J.) **70,** 304–309(BN)

____ (see Ding, H. J.) **70,** 436–445

Chen, Z., Atwood, J. L., and Mai, Y.-W. — Rate-Dependent Transition From Thermal Softening to Hardening in Elastomers. **70,** 611–612(BN)

Cheng, G., and Zu, J. W. — Nonstick and Stick-Slip Motion of a Coulomb-Damped Belt Drive System Subjected to Multifrequency Excitations. **70,** 871–884

Cheng, Z.-Q., and Reddy, J. N. — Green's Functions for Infinite and Semi-infinite Anisotropic Thin Plates. **70,** 260–267

Cherniy, V. P. — The Bending of Curved Pipes With Variable Wall Thickness. **70,** 253–259

Chessa, J., and Belytschko, T. — An Extended Finite Element Method for Two-Phase Fluids. **70,** 10–17

Choi, S. T., and Earmme, Y. Y. — Elastic Singularity Interacting With Various Types of Interfaces. **70,** 446–448(BN)

Chou, W.-T. — (see Wang, L.-S.) **70,** 583–594

Chua, C. F. — (see Ng, T. Y.) **70,** 601–605

Chuang, T. J. — (see Hsueh, C. H.) **70,** 151–154(BN)

Chung, Y.-L., and Chen, M.-R. — Dynamic Analysis of a Mode I Propagating Crack Subjected to a Concentrated Load. **70,** 668–675

Cochard, A., Bureau, L., and Baumberger, T. — Stabilization of Frictional Sliding by Normal Load Modulation. **70,** 220–226

Cole, K. A. — (see Lei, H.) **70,** 902–914

Costello, G. A. — (see Paris, A. J.) **70,** 364–373

Crouch, S. L. — (see Wang, J.) **70,** 619–621(BN)

Davies, J. H. — Elastic Field in a Semi-Infinite Solid due to Thermal Expansion or a Coherently Misfitting Inclusion. **70,** 655–660

De Angelis, M. — (see Luş, H.) **70,** 715–723

Debesis, W. R., and Burns, S. J. — Comparison of Stresses in Center-Wound Rolls From Two Linear Elastic Models. **70,** 606–610(BN)

de Langre, E. — (see Schmid, P. J.) **70,** 894–901

Diderrich, G. — (see Marshall, D. L.) **70,** 625–632

Ding, H. J., Wang, H. M., and Chen, W. Q. — On Stress-Focusing Effect in a Uniformly Heated Solid Sphere. **70,** 304–309(BN)

____, **Wang, H. M., and Chen, W. Q.** — Transient Responses in a Piezoelectric Spherically Isotropic Hollow Sphere for Symmetric Problems. **70,** 436–445

Di Paola, M. — (see Failla, G.) **70,** 708–714

Djerassi, S., and Bamberger, H. — Constraint Forces and the Method of Auxiliary Generalized Speeds. **70,** 568–574

Dong, Y. — (see Liu, Y.) **70,** 688–695

____ (see Soh, C. K.) **70,** 681–687

Dowell, E. H., and Tang, D. — Multiscale, Multiphenomena Modeling and Simulation at the Nanoscale: On Constructing Reduced-Order Models for Nonlinear Dynamical Systems With Many Degrees-of-Freedom. **70,** 328–338

Doyoyo, M. — (see Wierzbicki, T.) **70,** 204–211

Ding, H. J., Wang, H. M., and Chen, W. Q. — On Stress-Focusing Effect in a Uniformly Heated Solid Sphere. **70,** 304–309(BN)

____, **Wang, H. M., and Chen, W. Q.** — Transient Responses in a Piezoelectric Spherically Isotropic Hollow Sphere for Symmetric Problems. **70,** 436–445

Di Paola, M. — (see Failla, G.) **70,** 708–714

Djerassi, S., and Bamberger, H. — Constraint Forces and the Method of Auxiliary Generalized Speeds. **70,** 568–574

Dong, Y. — (see Liu, Y.) **70,** 688–695

____ (see Soh, C. K.) **70,** 681–687

Dowell, E. H., and Tang, D. — Multiscale, Multiphenomena Modeling and Simulation at the Nanoscale: On Constructing Reduced-Order Models for Nonlinear Dynamical Systems With Many Degrees-of-Freedom. **70,** 328–338

Doyoyo, M. — (see Wierzbicki, T.) **70,** 204–211

Dross, D. — (see Wang, Y.-S.) **70,** 676–680
Duong, C. N., and Yu, J. — Analysis of a Plate Containing a Polygon-Shaped Inclusion With a Uniform Eigencurvature. **70,** 404–407
Dursunkaya, Z., and Nair, S. — Solidification of a Finite Medium Subject to a Periodic Variation of Boundary Temperature. **70,** 633–637

Earmme, Y. Y. — (see Choi, S. T.) **70,** 446–448(BN)
Elishakoff, I., and Zingales, M. — Coincidence of Boobnov-Galerkin and Closed-Form Solutions in an Applied Mechanics Problem. **70,** 777–779(BN)
El-Karamany, A. S. — Boundary Integral Equation Formulation in Generalized Linear Thermo-Viscoelasticity With Rheological Volume. **70,** 661–667
Eslami, M. R. — (see Jabbari, M.) **70,** 111–118

Failla, G., Spanos, P. D., and Di Paola, M. — Response Power Spectrum of Multi-Degree-of-Freedom Nonlinear Systems by a Galerkin Technique. **70,** 708–714
Fannjiang, A. C. — (see Paulino, G. H.) **70,** 531–542
Felske, J. D. — (see Mollendorf, J. C.) **70,** 346–350
Ferrari, M. — (see Nadeau, J. C.) **70,** 200–203
Fischer, F. D., Rammerstorfer, F. G., and Friedl, N. — Residual Stress-Induced Center Wave Buckling of Rolled Strip Metal. **70,** 84–90
Fraser, W. B. — (see van der Heijden, G. H. M.) **70,** 771–774(BN)
Friedl, N. — (see Fischer, F. D.) **70,** 84–90
Fu, G. — (see Chandra, A.) **70,** 783
Fujimoto, T. — (see Nishioka, T.) **70,** 505–516

Galic, D., and Horgan, C. O. — The Stress Response of Radially Polarized Rotating Piezoelectric Cylinders. **70,** 426–435
Ganapathi, M., Patel, B. P., and Makhecha, D. P. — Nonlinear Free Flexural Vibration of Oval Rings. **70,** 774–777(BN)
Gao, B. — (see Chao, C.-K.) **70,** 169–179
García, J., and Oñate, E. — An Unstructured Finite Element Solver for Ship Hydrodynamics Problems. **70,** 18–26
Genkai, T. — (see Noda, N.-A.) **70,** 487–495
Georgiadis, H. G. — The Mode III Crack Problem in Microstructured Solids Governed by Dipolar Gradient Elasticity: Static and Dynamic Analysis. **70,** 517–530
Giannakopoulos, A. E. — The Influence of Initial Elastic Surface Stresses on Instrumented Sharp Indentation. **70,** 638–643
Gladwell, G. M. L., Khonsari, M. M., and Ram, Y. M. — Stability Boundaries of a Conservative Gyroscopic System. **70,** 561–567
Gray, L. J., Kaplan, T., Richardson, J. D., and Paulino, G. H. — Green's Functions and Boundary Integral Analysis for Exponentially Graded Materials: Heat Conduction. **70,** 543–549
Grigoriu, M. D. — (see Kulkarni, S. S.) **70,** 408–417
Grosh, K. — (see Barber, J. R.) **70,** 465–469
Guilliorit, E. — (see Bacon, C.) **70,** 268–274

Hafez, M., and Housman, J. — Numerical Solutions of Cauchy-Riemann Equations for Two and Three-Dimensional Flows. **70,** 27–31
Hao, H. — (see Zhang, Y.-Q.) **70,** 454–457(BN)
____ (see Zhang, Y.-Q.) **70,** 649–654
Hasegawa, H., and Kisaki, M. — The Stress Field Caused by a Circular Cylindrical Inclusion in a Transversely Isotropic Elastic Solid. **70,** 825–831
Horgan, C. O. — (see Galic, D.) **70,** 426–435
Hosten, B. — (see Bacon, C.) **70,** 268–274
Housman, J. — (see Hafez, M.) **70,** 27–31
Hsueh, C. H., Lee, S., and Chuang, T. J. — An Alternative Method of Solving Multilayer Bending Problems. **70,** 151–154(BN)
Hu, H. — On the Nonlinear Generalized Maxwell Fluid Model. **70,** 309–310(BN)
Huang, G.-Y. — (see Wang, Y.-S.) **70,** 676–680
Huang, H. — (see Kardomateas, G. A.) **70,** 191–199
Huang, Z. L. — (see Zhu, W. Q.) **70,** 129–136
Hughes, Thomas J. R. — (see Tezduyar, Tayfun E.) **70,** 1
Hwu, C. — Stroh-Like Complex Variable Formalism for the Bending Theory of Anisotropic Plates. **70,** 696–707

Itou, S. — Thermal Stresses in an Infinite Elastic Pipe Weakened by a Finite Cylindrical Crack. **70,** 616–618(BN)
Ivshin, Y. — (see Marshall, D. L.) **70,** 625–632

Jabbari, M., Sohrabpour, S., and Eslami, M. R. — General Solution for Mechanical and Thermal Stresses in a Functionally Graded Hollow Cylinder due to Nonaxisymmetric Steady-State Loads. **70,** 111–118
Jen, M.-H. R. — (see Lin, C.-H.) **70,** 391–403

Kaiho, M. — (see Kato, C.) **70,** 32–43
Kaplan, T. — (see Gray, L. J.) **70,** 543–549
Kardomateas, G. A., and Huang, H. — The Initial Post-buckling Behavior of Face-Sheet Delaminations in Sandwich Composites. **70,** 191–199
Kato, C., Kaiho, M., and Manabe, A. — An Overset Finite-Element Large-Eddy Simulation Method With Applications to Turbomachinery and Aeroacoustics. **70,** 32–43
Keer, L. M. — (see Borodich, F. M.) **70,** 783(D)
Ketema, Y. — Approximate Model for a Viscoelastic Oscillator. **70,** 757–761
Khonsari, M. M. — (see Gladwell, G. M. L.) **70,** 561–567
Kisaki, M. — (see Hasegawa, H.) **70,** 825–831
Kokini, K. — (see Rangaraj, S.) **70,** 234–245
Kong, L., and Parker, R. G. — Equilibrium and Belt-Pulley Vibration Coupling in Serpentine Belt Drives. **70,** 739–750
Ku, C.-P. R. — (see Park, J. S.) **70,** 299–302(BN)
Kulkarni, S. S., Mukherjee, S., and Grigoriu, M. D. — Local Solutions in Potential Theory and Linear Elasticity Using Monte Carlo Methods. **70,** 408–417
Kumar, V. — (see Stein, K.) **70,** 50–57
Kuo, B.-L., and Chen, C.-K. — Application of a Hybrid Method to the Solution of the Nonlinear Burgers' Equation. **70,** 926–929(BN)
Kuo, Ming-Chang — (see Lu, Chung-Jen) **70,** 339–345
Kyle, C. — (see Stein, K.) **70,** 50–57

Lam, K. Y. — (see Ng, T. Y.) **70,** 601–605
Landis, C. M. — On the Strain Saturation Conditions for Polycrystalline Ferroelastic Materials. **70,** 470–478
Lee, K. Y. — (see Li, X.-F.) **70,** 930(D)
Lee, S. — (see Hsueh, C. H.) **70,** 151–154(BN)
Lee, W. — Analytically Approximate Solutions for Vibrations of a Long Discrete Chain. **70,** 302–304(BN)
Lei, H., Cole, K. A., and Weinstein, S. J. — Modeling Air Entrainment and Temperature Effects in Winding. **70,** 902–914
Levin, V. A., and Zingermann, K. M. — Effective Constitutive Equations for Porous Elastic Materials at Finite Strains and Superimposed Finite Strains. **70,** 809–816
Li, H. — (see Ng, T. Y.) **70,** 601–605
Li, S. — On Global Energy Release Rate of a Permeable Crack in a Piezoelectric Ceramic. **70,** 246–252
____ Closure to "On Global Energy Release Rate of a Permeable Crack in Piezoelectric Ceramic" (2003, ASME J. Appl. Mech., 70, p. XX). **70,** 930–931

Li, X.-F., and Lee, K. Y. — Discussion of "On Global Energy Release Rate of a Permeable Crack in Piezoelectric Ceramic," by S. Li-Discussion by X.-F. Li and K. Y. Lee. **70,** 930(D)
Liew, K. M., Zhang, J. Z., Ng, T. Y., and Reddy, J. N. — Dynamic Characteristics of Elastic Bonding in Composite Laminates: A Free Vibration Study. **70,** 860–870
Lin, C.-H., and Jen, M.-H. R. — Analysis of Laminated Anisotropic Cylindrical Shell by Chebyshev Collocation Method. **70,** 391–403
Liu, C.-S. — (see Mukherjee, S.) **70,** 644–648
Liu, W., and Rahn, C. R. — Fiber-Reinforced Membrane Models of McKibben Actuators. **70,** 853–859
Liu, Y., Soh, C. K., Dong, Y., and Yang, Y. — A Displacement Equivalence-Based Damage Model for Brittle Materials—Part II: Verification. **70,** 688–695
_____ (see Soh, C. K.) **70,** 681–687
Lou, Y. C., and Wang, M. Z. — Michell's General Solutions for Torsionless Axisymmetric Problems With Body Forces in Elasticity. **70,** 448–449(BN)
Lu, Chung-Jen, and Kuo, Ming-Chang — Coefficients of Restitution Based on a Fractal Surface Model. **70,** 339–345
Luş, H., De Angelis, M., and Betti, R. — A New Approach for Reduced Order Modeling of Mechanical Systems Using Vibration Measurements. **70,** 715–723

Mai, Y.-W. — (see Chen, Z.) **70,** 611–612(BN)
Makhecha, D. P. — (see Ganapathi, M.) **70,** 774–777(BN)
Manabe, A. — (see Kato, C.) **70,** 32–43
Mantič, V., Calzado, F. J., and París, F. — Novel Boundary Integral Equations for Two-Dimensional Isotropic Elasticity: An Application to Evaluation of the In-Boundary Stress. **70,** 817–824
Marshall, D. L., Taylor, M. E., Ivshin, Y., Diderrich, G., and Pence, T. J. — On Corrosion-Induced Creep and the Shedding of Oxide Pest From Metal Plates. **70,** 625–632
McDevitt, T. J., and Simmonds, J. G. — Crushing of an Elastic-Plastic Ring Between Rigid Plates With and Without Unloading. **70,** 799–808
Meir, A. J. — (see Bakhtiyarov, S. I.) **70,** 351–358
Mittal, S. — Flow Control Using Rotating Cylinders: Effect of Gap. **70,** 762–770
_____ (see Akin, J. E.) **70,** 2–9
Mogilevskaya, S. G. — (see Wang, J.) **70,** 619–621(BN)
Mollendorf, J. C., Felske, J. D., Samimy, S., and Pendergast, D. R. — A Fluid/Solid Model for Predicting Slender Body Deflection in a Moving Fluid. **70,** 346–350
Montheillet, F. — (see Chalon, F.) **70,** 789–798
Mukherjee, S., and Liu, C.-S. — Computational Isotropic-Workhardening Rate-Independent Elastoplasticity. **70,** 644–648
_____, **and Paulino, Glaucio H.** — The Elastic-Viscoelastic Correspondence Principle for Functionally Graded Materials, Revisited. **70,** 359–363
_____ (see Kulkarni, S. S.) **70,** 408–417

Nadeau, J. C., and Ferrari, M. — Bounds on Texture Coefficients. **70,** 200–203
Nair, S. — (see Dursunkaya, Z.) **70,** 633–637
